

Kerala agricultural University

## About the app

The purpose of the 'app' would be to provide a platform for request of diagnostic services by the farmers/ agricultural officers, provide consultancy services to the farmers using the expertise of scientists from the Kerala Agricultural University, maintain a database of the problems affecting farmers in AEU 1, 3, 4, 12, 13 along with the recommendations and solutions provided.

## Purpose

'Karshaka Santwanam app' would help strengthen the extent of assistance provided to the farmers through the Karshaka Santhwanam scheme.

 available on Google PlayStore

Reaching Out To Farmers

# Karshaka Santhwanam Project

The Karshaka Santhwanam project under auspices of the RARS (SZ), Vellayani team, has been a success amongst the farmers in the southern regions of Kerala

## Need for the app

To enhance the farmer-scientist interaction, it is understood that there is need for the development of an 'app' to assist farmers under the Karshaka Santhwanam scheme.

## Objectives

- To provide a platform for the request of diagnostic services by the farmers
- To provide consultancy services to the farmers using the expertise of scientists from the Kerala Agricultural University
- To maintain a database of the problems affecting crops along with the recommendations and solutions provided
